

# Multiple Chemical Sensitivity

**FACT: Multiple Chemical Sensitivity is as real as cancer, diabetes, and broken bones.**

**FACT: Multiple Chemical Sensitivity reactions are as unpredictable and debilitating as epileptic seizures, insulin reactions, and asthma attacks.**

**FACT: Multiple Chemical Sensitivity is sometimes as progressive and life-threatening as multiple sclerosis, heart disease, and ALS.**

**FACT: Multiple Chemical Sensitivity can be as manageable as diabetes, hypertension, and thyroid disease.**

**THERE IS HELP!**

**If you are an MCS patient or the health care provider for an MCS patient and you are in need of effective treatment resources or support services, please contact:**
